Preface

This is an edition of Johan Helmich Roman's (1694–1758) *Assaggi à Violino Solo* and *Ouverture à Violino Solo*, with BeRI numbers (after Ingmar Bengtsson) 301–324. It is in no way a complete collection of Roman's solo violin music, but to my knowledge it is the most comprehensive edition of his Assaggi, rivalled only by Bengtsson and Frydén's *Assaggi à Violino Solo* from Edition Reimers which include BeRI 301, 303, 310, 314, 320 and 324. The Ouvertures are not known from any modern editions. The explanation of the missing BeRI numbers in this edition (308, 309, 315, 316) is that those numbers were left empty to provide space if those pieces were later rediscovered. The number series was constructed from the Brant copy (see below), which has blank pages where these Assaggi probably resided.

The main source for this edition is *Ro nr 60*, a manuscript written by Per Brant (1714–1767), Romans pupil and successor. This manuscript covers BeRI 301–322, except the missing numbers described above. The other sources used are *Ro nr 97(2a)* and *Ro nr 61(2)*, which BeRI 323 and 324 are taken from. All sources are now preserved at the Music Library of Sweden in Stockholm, who graciously has provided the copies that I have used. If any questions about this edition arise, it may be wise to compare to the sources which should be available from the same place (<http://www.lysator.liu.se/runeberg/rassavln/>) as this edition. Other sources used include facsimiles of the print of BeRI 314, here added as an appendix, from Bengtsson and Frydén's *Assaggi à Violino Solo*.

While making this edition I have always tried to keep it as close to the original score as possible. For example, the beams and slurs are the same as in the original manuscript. All accidentals have been copied exactly as written, but in cases where today's practice is different, I have tried to clarify by putting accidentals *above* the staves. In the original, some passages were written in soprano, alto, and even bass clefs, but these have been converted to treble clef. In the case of the bass clef, the music has also been octavated as customary with music by Roman. See my edition of BeRI 7, also available for free at <http://www.lysator.liu.se/runeberg/rsjkmus/>, for more examples of this practice.

Many of the ornaments in the Brant copy can be understood better if one compare the two movements in the appendix to the corresponding movements in the main edition. In this print Roman has written out many ornaments and arpeggios.

The purpose of this edition, as well as all other music released by me, is a combination of me trying to learn more about 17:th and 18:th century music, and, at the same time, helping other people to get hold of interesting and uncommon music. Suggestions and corrections can be sent to the address below.
